## tiles for swimming pools

Cotto Furnò terracotta tiles are particularly suitable for swimming pool decks and boarders. The unique composition of its natural elements, lava sand and clay from the Etna volcano, gives this terracotta particular characteristics of hardness and skid, chemical and scratch resistance.

For all outdoor applications, to avoid «attack» from efflorescence (white salt marks) or seawater and salty environments Furnò Kwikdry is factory treated to protect its structure but still able to breathe (3 to 4% absorbency) to assure a high level of non-slipperiness.
